Musician Ear Plugs

Musician Ear Plugs cost $165 which includes the plugs themselves, one set of filters (either 9 dB, 15 dB, or 25 dB), the initial evaluation, and follow up evaluation.

The initial evaluation consists of:
- Otoscopy (visual inspection of ear canal)
- Tympanometry (evaluation of tympanic membrane functioning)
- Audiometry (test of hearing acuity)
- Earmold Impressions

The earmolds are sent out to the company and usually take about 2 weeks to return to the clinic. Once the MEPs (Musician Ear Plugs) return to the clinic, our receptionist will contact you to schedule your follow-up appointment.

The follow-up appointment consists of:
- Ensuring the MEPs fit properly
- Testing the filters within the MEPs
- Education regarding use and care of your MEPs
